REF. NO. U67-N92-01

SUBJECT: Resubmittal of Map and Corrected Deviations on Western
Clay Company's Last Chance No. 26 Mining Claim.

ATTN: Ms. Penelope J. Smalley

Dear Ms. Smalley:

The purpose of this letter is to amend the letter written to you on July 1, 1993. The reason is that after further field work it was found the boundary lines needed to be changed to be in compliance.

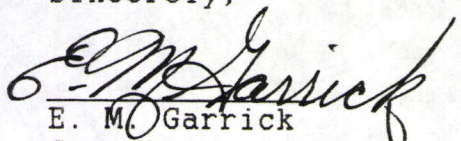

After reviewing the problem with management of Western Clay it was concluded a new survey and map should be done to properly illustrate the area required for the present operation.

Enclosed is a map showing changes. The map is self explanatory and shows a more workable program for the bentonite operation. The area disturbed is 4.32 acres.

It was necessary to make the changes because of the quality of material. This was not determined until the operation was started and the material exposed for testing.

We apologize for the inconvenience and will keep you informed if any other changes are proposed.

Sincerely,

E. M. Garrick
Consulting Geologist, Agent
